

In the Specification:

On page 2, please insert the following paragraph prior to paragraph [0036]:

--FIG. 5 is a view similar to FIG. 3 showing an insert/slug that is tapered.—

On page 2, please amend paragraph [0041] as follows:

--As the source approaches exhaustion, the level observed in the reservoir when inverted drops to be in slug/glass annulus 127. As in the FIG. 1 embodiment, this gives a good indication of impending exhaustion. FIG. 5 shows an embodiment of the dispenser where the slug 124 is tapered.--
